

# Mahan Delijan Fibers

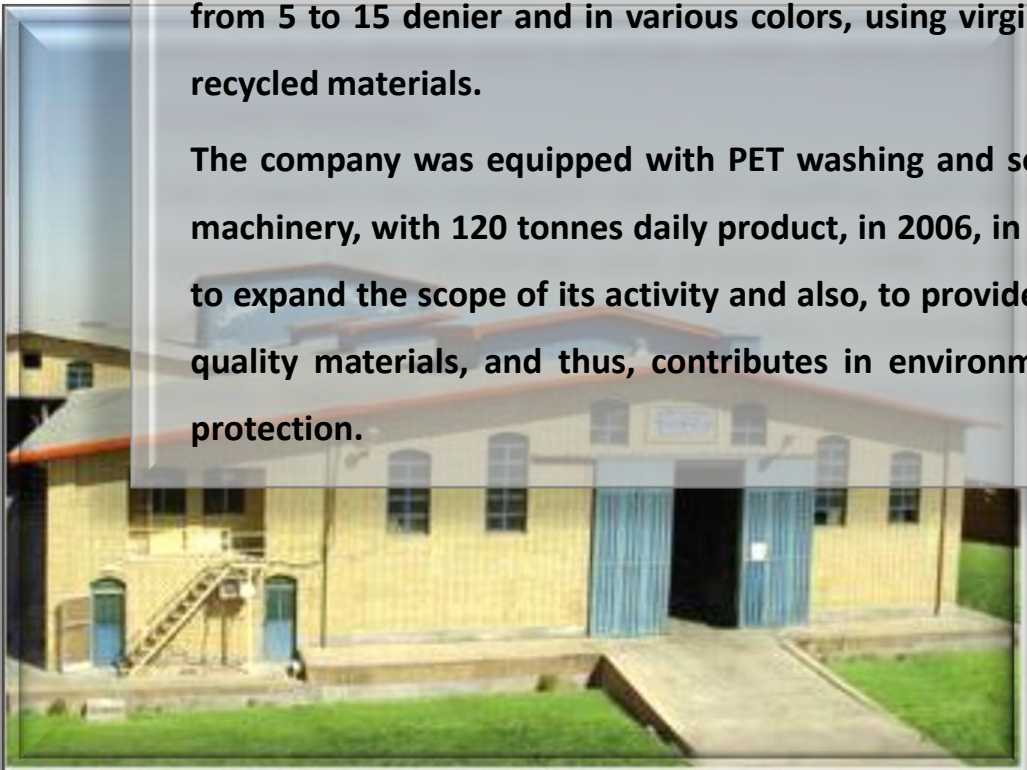

Polyester Staple Fiber Manufacturer

# About us:

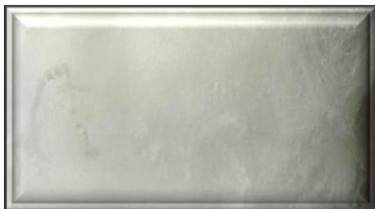

Mahan Delijan Co., as a member of Abrisham Mahan industrial and commercial group, has been founded in 2004 with annual capacity of 14000 tonnes. The company's main product include solid normal denier, siliconized and non-siliconized polyester staple fiber (PSF) with finesse ranged from 5 to 15 denier and in various colors, using virgin and recycled materials.

The company was equipped with PET washing and sorting machinery, with 120 tonnes daily product, in 2006, in order to expand the scope of its activity and also, to provide high quality materials, and thus, contributes in environmental protection.

# Productions:

The company's products include polyester staple fiber with various fineness (5-15 denier) and colors.

## Fiber specification:

Parameters	unit	
Elongation	%	50
Finesse	Denier	5-15
Crimp number	N/Cm	2-5
Moisture	%	0.4-1.2

# R@D and Quality control system

Being a pioneer between Iranian polyester manufacturers is one of the most important objectives of the company, therefore, the corporation has a strong emphasis on research and development unit. Also, utilizing skilled personnel and equipped laboratories, quality control system has a duty to control the manufacturing process, which starts from controlling the quality of raw materials to determination of the characteristics of the final product.

Besides, the company continually works closely with technical institutes and universities to pioneer product solutions that are truly innovative and significant to current and future development marketplaces.
